

LICENSED • BONDED • INSURED
SERVICES PROVIDED

- Protective Coatings
- Concrete Diamond Grinding
- Abrasive Blasting
- Shot Blasting
- Urethane Mortar
- Concrete Repair & Crack Injection
- Polished Concrete
- Acid Stained Floors
- Metallics Epoxy Floors
- Decorative Flake & Quartz Floors
- Secondary Containment
- AAMP, PCS, CCI, Senior III, MCI

 4EpoxyFloors.com

List of Services:

At **Protective Coatings Epoxy Systems**, we provide a comprehensive array of specialized services designed to enhance and protect your space. From industrial facilities to commercial spaces and residential areas, our offerings are tailored to meet diverse needs with precision and quality assurance.

What Services Does Protective Coatings Offer Me as a Customer?

- **Industrial Epoxy:** High-performance epoxy flooring solutions ideal for industrial settings, offering durability and chemical resistance.
- **Urethane Flooring:** Seamless urethane coatings that provide exceptional durability and resistance to chemicals and abrasions.
- **Polished Concrete:** Enhances the natural beauty of concrete with a polished finish, offering durability and low maintenance.
- **Quartz Flooring:** Decorative flooring system with quartz granules broadcasted in a pigmented epoxy, providing texture and durability.

- **Flake Flooring:** Epoxy floor coating with decorative vinyl flakes, offering a blend of durability and aesthetics.
- **Metallic Flooring:** Metallic epoxy flooring system that creates a unique, three-dimensional appearance with metallic pigments.
- **PolyAspartic Coatings:** Fast-curing polyaspartic coatings ideal for quick turnaround projects requiring high durability.
- **Urethane Concrete Mortar Systems:** Heavy-duty urethane mortar systems for areas subjected to thermal shock and chemical exposure.
- **Mastic & Glue Removal:** Professional removal of adhesives and mastics from concrete surfaces, preparing them for new flooring.
- **Anti-Microbial Flooring:** Flooring solutions designed to inhibit the growth of microorganisms, ideal for healthcare and food processing facilities.
- **MMA Coatings:** Methyl methacrylate coatings known for their rapid cure time and durability, suitable for high-traffic areas.
- **Epoxy & Urethane Cement & Coving:** Seamless flooring and wall systems with integral coving for sanitary and chemical-resistant surfaces.
- **Shotblasting & Sandblasting:** Surface preparation methods to profile concrete and remove contaminants for optimal coating adhesion.
- **Concrete Diamond Grinding:** Precision grinding to smooth and level concrete surfaces, preparing them for coatings or polishing.

- **Floor Removal & Scarification:** Removal of existing flooring materials and scarification of concrete to prepare for new installations.
- **Safety & Hazard Coatings:** Non-slip and hazard-marking coatings to enhance safety in industrial and commercial environments.
- **Safety Line Striping:** Marking and striping services to delineate traffic flow, parking areas, and safety zones with durable coatings.
- **Crack Bridging & Joint Sealing:** Sealant applications to prevent water ingress and protect concrete from damage caused by expansion and contraction.
- **Line Striping:** Precision line striping for parking lots, warehouses, and industrial facilities to optimize space utilization and traffic flow.
- **Joint Cleaning & Sealing:** Cleaning and sealing of expansion joints in concrete to prevent deterioration and maintain structural integrity.
- **Burnishing & Sealer Application:** Burnishing services to enhance the shine of polished concrete and application of sealers to protect surfaces.
- **Polyurethane & Urethane Coatings:** High-performance coatings offering excellent chemical resistance and durability for various substrates.
- **Polyaspartic and Vinyl Ester Applications:** Advanced coatings with rapid cure times and superior chemical resistance, suitable for demanding environments.
- **NACE-Certified Coating Inspection:** Inspection services by certified NACE inspectors to ensure compliance and quality control in coating applications.
- **Floor Resurfacing:** Restoration and resurfacing of worn or damaged floors to extend their lifespan and enhance aesthetics.
